Subject: Declaration regarding the date printed on FILA Solutions product packaging

FILA Solutions S.p.A. SB hereby declares that the date printed on product bottles and canisters corresponds to the production date of the product.

FILA Solutions products do not carry an expiration date. However, in order to guarantee the best product performance and optimal conditions of use, a recommended shelf life should be considered, calculated starting from the production date.

The recommended shelf life is approximately as follows:

- *Cleaning products*: approximately 8 years from the production date;
- *Water-based protectors*: approximately 5 years from the production date;
- *Solvent-based protectors*: approximately 8 years from the production date;
- *Liquid waxes*: approximately 4 years from the production date.

Please note that, within the category of cleaning products, SR95 and NOSPOT are exceptions and have a recommended shelf life of approximately 2 years from the production date.

The above indications are valid provided that the products are stored correctly, in their original tightly closed packaging and in suitable environments, protected from heat sources, frost, and direct sunlight.

We remain at your disposal for any further clarification.

Best regards,

FILA Solutions S.p.A. SB
